

CLCA SLO PRESENTS

OUTDOOR WATER CONSERVATION TECHNIQUES

Join us June 17th 7-9pm at the Paso Robles City Hall, 1000 Spring Street, for our next program meeting. Come to learn about the best water conservation techniques for your North County landscape. We will be demonstrating the latest technology in landscape irrigation components and how to grow to beautiful gardens using climate appropriate plants. We will also discuss details about the new summer water use restrictions in place for Paso Robles and Atascadero's landscape rebate program.

Guest Speakers will include representatives from the City of Paso Robles Water Conservation Department, Atascadero Mutual Water Company, Ewing Irrigation Education Programs, and Native Sons Wholesale Nursery. Several vendor booths will be set up to display info and products to help everyone save water, time, & money in the garden during this current drought cycle.

Free for all CLCA Members and the general public. Complimentary coffee, tea, & dessert will be served. Contact Josh Carmichael, CLCA SLO Programs Director at (805) 801-6956 for more information.
