

Turf Replacement REBATE

New State of California Turf Replacement Rebate Program for Residential Properties

As of August 12, 2015, the California Department of Water Resources is offering rebates for removing turf at residential properties and replacing it with drought-tolerant landscaping. The State's rebate program may provide up to \$2 per square foot of grass lawn that is removed and replaced. The rebate is limited to a maximum of \$2,000 per eligible household.

Applicants may apply for the State rebate in conjunction with the City of Paso Robles Landscape Rebate. However, the total rebated amount, including any rebate the homeowner receives from another agency (e.g. The City of Paso Robles), can't exceed a total of \$2 per square foot or \$2,000. In other words, if a City of Paso Robles water customer applies for both the City and State turf replacement rebates, the State may provide the difference between the City's rebate and the state maximum amounts.

Note: the State's rebate program will require application and enrollment independently of the City's rebate and has differing eligibility criteria. Customers interested in participating in the State's rebate will need to apply for that rebate on their own. The City of Paso Robles is not responsible for or involved in administering the State's rebate program. For more information on the State's rebate, to determine your eligibility, or to enroll in the State rebate program, visit the website below:

If you **are** interested in applying for both the City and State's rebate programs, you should confirm that all of the City's and State's requirements are met **before removing your turf or beginning any work.**

- Pre-inspection by the City is required prior to enrollment in the City's rebate program and beginning work.
- An application for the State's rebate must be submitted to the State online and your reservation approved by the State prior to beginning work (i.e. turf removal).

If you **are not** participating in the State's rebate program, you may begin work on your turf removal project following completion of the pre-inspection by City staff. Completion of the pre-inspection with the City of Paso Robles staff will complete the initial step of your enrollment in the City's rebate program only.

Please visit www.PasoWater.com or call (805) 227-7250 for information on the City's Rebate Program
